

Banpu 3Q25 results

Opportunity Day

20th November 2025

DISCLAIMER

The information contained in this presentation is intended solely for your reference.

This presentation contains “forward-looking” statements that relate to future events, which are, by their nature, subject to significant risks and uncertainties. All statements, other than statements of historical fact contained in this presentation including, without limitation, those regarding Banpu’s future financial position and results of operations, strategy, plans, objectives, goals and targets, future developments in the markets where Banpu participates or is seeking to participate and any statements preceded by, followed by or that include the words “believe”, “expect”, “aim”, “intend”, “will”, “may”, “project”, “estimate”, “anticipate”, “predict”, “seek”, “should” or similar words or expressions, are forward-looking statements.

The future events referred to in these forward-looking statements involve known and unknown risks, uncertainties and other factors, some of which are beyond our control, which may cause the actual results, performance or achievements, or industry results to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements.

These forward-looking statements are based on numerous assumptions regarding our present and future business strategies and the environment in which Banpu will operate in the future and are not a guarantee of future performance. Such forward-looking statements speak only as of the date on which they are made. Banpu does not undertake any obligation to update or revise any of them, whether as a result of new information, future events or otherwise. The information set out herein is subject to change without notice, its accuracy is not guaranteed, has not been independently verified and it may not contain all material information concerning the Company.

Banpu makes no representation, warranty or prediction that the results anticipated by such forward-looking statements will be achieved, and such forward-looking statements represent, in each case, only one of many possible scenarios and should not be viewed as the most likely or standard scenario. No assurance given that future events will occur or our assumptions are correct. Actual results may materially differ from those provided in the forward-looking statements and indications of past performance are not indications of future performance. In no event shall Banpu be responsible or liable for the correctness of any such material or for any damage or lost opportunities resulting from use of this material. Banpu makes no representation whatsoever about the opinion or statements of any analyst or other third party. Banpu does not monitor or control the content of third party opinions or statements and does not endorse or accept any responsibility for the content or use of any such opinion or statement.

Banpu’s securities have not been and will not be registered under the U.S. Securities Act of 1933, as amended, or the securities laws of any state of the United States, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of such act or such laws.

This presentation does not constitute an offer to sell or a solicitation of an offer to buy or sell Banpu’s securities in any jurisdiction.

01 **Energy Symphonics: Phase 2**

Simplification of Banpu group structure to unlock value and create stronger growth platform

- **Introduction: Energy Symphonics**
- Restructuring: Overview & Rationale
- Restructuring: Details

Context: the evolving Energy Balance ...

Technology

Surge in electricity demand for digital infrastructure, driven by AI-workload needs. Data center electricity demand 9X by 2050.

Electrification

Transport (e-mobility), industry, buildings (e.g., heat pumps): accelerated electrification to meet Net Zero 2050 objective.

Demographics

Four-fifths of humanity in the developing world: rapid urbanization and economic growth. Power is key 'enabler'.

Reliable

Reliability and resiliency of electricity supply essential for digital infrastructure and critical services (e.g., hospitals). Favors thermal power, nuclear and BESS.

Affordable

LCOE* of thermal power, solar and wind have advantages over alternatives, e.g., nuclear, green hydrogen.

Eco-friendly

Rapidly improving economics of carbon capture make gas a long-term option in conjunction with renewables, nuclear, etc.

*Levelized Cost of Electricity

Banpu Energy Symphonics: key objectives revisited

01

Operational Excellence

Focus on cost savings, margin enhancement, and cash flow stability. Maximize dividends to shareholders.

02

Corporate Restructuring

Internal restructuring of selected BUs (BKV, BPP, BNEXT) to maximize value and refocus on core businesses and coherent investor relations strategy.

03

Building New Growth Engine

Build Power+ pillar, alongside other core pillars, as growth engines that can be positioned as future cash cows.

04

Portfolio Refocus

Strong focus on capturing value-creating opportunities with attractive returns, rechanneling resources for high-growth assets.

05

Rebalance Capital Structure

Strengthen balance sheet to ensure financial flexibility and resiliency.

3Ds at the core

Accelerate **Digitalization**, commit to **Decarbonization**, and foster **Dynamic People** across all business units.

Banpu restructuring plan overview

Second phase of Banpu's Energy Symphonics strategy: simplification of group structure

Phase 1 : BKV IPO and growth

- Banpu US closed-loop gas business, BKV, listed on NYSE, 26th Sept 2024
- \$270M raised in IPO
- CCUS pioneer: 16 mtpa plan
- Bedrock Energy acquisition (Sept 2025): +108 MMcfd
- Banpu: 71% shareholding

Phase 2 : Streamline group structure 2025-26

SALES OF US-BASED POWER GENERATION JV

BANPU-BPP AMALGAMATION

FOUR CORE GROWTH PILLARS

Phase 3

Value realization and new growth initiatives

Aligns with Energy Symphonics objectives: shareholder value, capital efficiency, alignment around core growth pillars, and structural decarbonization (coal <50% EBITDA by 2030)

Note: (1) Banpu Power PCL; (2) BKV-BPP Power, LLC

01 Energy Symphonics: Phase 2

Simplification of Banpu group structure to unlock value and create stronger growth platform

- Introduction: Energy Symphonics
- **Restructuring: Overview & Rationale**
- Restructuring: Details

Banpu group structure today: key transaction objectives

ILLUSTRATIVE ONLY

BANPU GROUP CURRENT STRUCTURE⁽¹⁾

BEFORE

Note: (1) Simplified structure; please refer to the Appendix for detailed breakdown of entities

Banpu group structure: before and after

ILLUSTRATIVE ONLY

BANPU GROUP CURRENT STRUCTURE⁽¹⁾

BEFORE

NEWCO STRUCTURE (POST-AMALGAMATION)⁽¹⁾

AFTER

Note: (1) Simplified structure; please refer to the Appendix for detailed breakdown of entities (2) Includes Banpu's indirect shareholding in BKV through Banpu North America Corporation, which is the 100% subsidiary of BOG Co., Ltd., a wholly-owned subsidiary of Banpu. BNAC holds approximately 71.0% of BKV's issued and outstanding common stock prior to the issuance of the stock consideration to Banpu Power US Corporation's (BPPUS), and, on a pro forma basis after giving effect to the proposed transaction, is expected to hold approximately 67.0% of BKV's issued and outstanding common stock; and BPPUS' shareholding in BKV of 5.6% post-transaction where the number of shares will be determined by dividing the amount equal to 50 percent of the total consideration by the 20-day VWAP ending 28 October 2025

Banpu post-restructuring: four strategic pillars with distinct strategies

Note: (1) Includes Banpu's indirect shareholding in BKV through Banpu North America Corporation, which is the 100% subsidiary of BOG Co., Ltd., a wholly-owned subsidiary of Banpu. BNAC holds approximately 71.0% of BKV's issued and outstanding common stock prior to the issuance of the stock consideration to Banpu Power US Corporation's (BPPUS), and, on a pro forma basis after giving effect to the proposed transaction, is expected to hold approximately 67.0% of BKV's issued and outstanding common stock; and BPPUS' shareholding in BKV of 5.6% post-transaction where the number of shares will be determined by dividing the amount equal to 50 percent of the total consideration by the 20-day VWAP ending 28 October 2025; (2) Battery Energy Storage System, including energy trading.

01 Energy Symphonics: Phase 2

Simplification of Banpu group structure to unlock value and create stronger growth platform

- Introduction: Energy Symphonics
- Restructuring: Overview & Rationale
- **Restructuring: Details**

Banpu group structure: pre- and post-amalgamation

ILLUSTRATIVE ONLY

CURRENT STRUCTURE

NEW STRUCTURE* (POST-AMALGAMATION) ⁽³⁾⁽⁴⁾

Note:

- (1) Banpu indirectly holds shares in BKV through Banpu North America Corporation, which is the 100% subsidiary of BOG Co., Ltd., a wholly-owned subsidiary of Banpu. BNAC holds approximately 71.0% of BKV's issued and outstanding common stock prior to the issuance of the stock consideration to BPPUS, and, on a pro forma basis after giving effect to the proposed transaction, is expected to hold approximately 67.0% of BKV's issued and outstanding common stock;
- (2) BPP indirectly holds through Banpu Power US Corporation, which is a wholly owned subsidiary of BPP;
- (3) Subject to the General Offer results.
- (4) The shareholding structure illustration has not yet assumed the dissenting share purchase.
- (5) The number of shares will be determined by dividing the amount equal to 50 percent of the total consideration by the 20-day VWAP ending 28 October 2025

**Diagrams do not show other Banpu PCL subsidiaries and businesses*

Transaction overview

Note: (1) Banpu Power PCL; (2) BKV-BPP Power, LLC; BPP indirectly holds through Banpu Power US Corporation, which is a wholly owned subsidiary of BPP;
(3) The number of shares will be determined by dividing the amount equal to 50 percent of the total consideration by the 20-day VWAP ending 28 October 2025

Track 1: Amalgamation of Banpu and BPP

AMALGAMATION OVERVIEW

Process Overview

- **Swap of all shares in Banpu PCL and BPP into shares in a ‘NewCo’** and list NewCo shares on the Stock Exchange of Thailand (“SET”)

Initial Share Swap Ratio*

**The swap ratio will be adjusted based on the participation rate⁽⁴⁾ after the General Offer to reflect changes in shareholding.*

	0.35575 NewCo shares : 1 Banpu share
	0.74615 NewCo shares : 1 BPP share⁽³⁾

Process Rationale

- **NewCo will maintain Banpu name and ticker** with a total of **4,049,621,973 shares** (at par of THB 10 per share) after capital increase by Banpu
- **Simplify the listing structure** by eliminating two-tier PCL and
- **Enhance efficiency** and support portfolio optimization
- **Eliminate corporate cost** duplication from dual listing status

Note: (1) NewCo will indirectly holds shares in BKV through (a) Banpu North America Corporation, which is the 100% subsidiary of BOG Co., Ltd., a wholly-owned subsidiary of Banpu. BNAC currently holds approximately 71.0% of BKV's issued and outstanding common stock prior to the issuance of the stock consideration to Banpu Power US Corporation (BPPUS), a wholly owned subsidiary of BPP. On a pro forma basis after giving effect to the proposed transaction, is expected to hold approximately 67.0% of BKV's issued and outstanding common stock; and (b) BPPUS which will hold approximately 5.6% in BKV post-sale of 25% in BKV-BPP Power, LLC, where the number of shares will be determined by dividing the amount equal to 50 percent of the total consideration by the 20-day VWAP ending 28 October 2025; (2) Indirectly held through BPPUS, which is a wholly owned subsidiary of BPP; (3) Excluding BPP's shares held by Banpu, as the allocation above already reflects the equity interest held by Banpu; (4) Number of shares sold in the general offer over shares not held by Banpu (650,532,203 shares)

Track 1: General Offer

Note: (1) Banpu indirectly holds shares in BKV through Banpu North America Corporation, which is the 100% subsidiary of BOG Co., Ltd., a wholly-owned subsidiary of Banpu. BNAC holds approximately 71.0% of BKV's issued and outstanding common stock ; (2) Indirectly held through Banpu Power US Corporation, which is a wholly owned subsidiary of BPP

GENERAL OFFER KEY TERMS AND CONDITIONS

Process Overview

Offeror

Amount

21.3% of total paid-up shares in BPP
(excluding shares held by the offeror)

General Offer Price

THB 13.00 per share

General Offer Period

1 December 2025 – 23 December 2025

Source of Funding

Internal cash and debt financing

Process Rationale

- Invest in a high-conviction business within the group
- Decreases potential dilution to Banpu’s shareholders from the amalgamation
- Expected to generate returns in-line with Banpu’s investment criteria

Track 2: BPP executes a sale of 25% in US-based power generation JV to BKV

Impact to Banpu's financial statements

■ Pre-deal ■ Post-deal (NewCo)

Given that BPP has been consolidated in Banpu's financial statements, NewCo's financial position will remain largely consistent with Banpu's, with key differences in minority interest and related equity items

Net Profit to Owners (US\$M)

Net Profit Margins (%)

Adjusted EPS (THB/Sh⁽¹⁾)

Equity Attributable to Owners of the Parent (US\$M)

Covenant Net D/E (x)

Return on Equity⁽²⁾ (%)

Remark : (1) Banpu's pre-deal EPS is adjusted with swap ratio for like-for-like comparison and adjusted to be the same par value as NewCo at THB 10 per share.

(2) Calculation using Net Profit to Owners of the Parent.

Phase 2 transaction benefits : NewCo to capture the AI boom

01 Unlock Value & Enable Growth Platforms

NEXT GEN MINING

Leverage mining experience to transition to high-value commodities

CLOSED-LOOP GAS

Consolidation of US gas-fired power under BKV to reflect true value

POWER+

Unlock full potential of power business by consolidating under one roof.

FUTURE TECH

Accelerate exploration of future trends in energy and beyond

02 Greater Focus, Greater Synergies

03 Boost cash flow from full ownership of Power+ Business

04 Strengthen balance sheet

The background of the slide features a dark blue, semi-transparent overlay with various financial data visualizations. These include candlestick charts, line graphs, and 3D bar charts, all rendered in a futuristic, glowing style with colors like cyan, magenta, and yellow. The overall aesthetic is high-tech and data-driven.

02

Financial Summary

Banpu: 3Q25 financial highlights

KEY FINANCIAL METRICS

Sales Revenue

\$1,358 M

Robust performance with strong contributions from smooth operations across all business units.

EBITDA

\$296 M

Strong support from Power and Gas business driven by seasonal demand.

ND/E

0.93 x

Maintained ND/E to ensure balanced capital structure for financial flexibility.

CORPORATE GOVERNANCE & ESG EXCELLENCE

Banpu earned recognition in the 2024 ASEAN Corporate Governance Scorecard (ACGS), securing an award in the ASEAN Asset Class category for demonstrating regional leadership in corporate governance and sustainability - one of only 74 Thai listed companies out of 250 across the ASEAN region to receive the award.

US gas market update

US Natural Gas Consumption

Unit: Bcf/d

■ Residential ■ Commercial ■ Industrial ■ Power ■ Other

Forecast

- US domestic natural gas consumption averaged 84 Bcf/d in 3Q25. Demand is softening as the US moves into the fall shoulder season.
- Weather-driven electricity demand remained the key factor in driving domestic consumption.
- EIA has raised its 2026 U.S. gas consumption forecast to an average of 92 Bcf/d, driven by expanding LNG capacity and rising electricity demand from data centers.

US Natural Gas Production

Unit: Bcf/d

— 2024 actual production — 2025 forecasted production
— 2024 actual export — 2025 forecasted export

- U.S. natural gas production edged up to 108 Bcf/d in 3Q25, 1% QoQ increase driven by more gas-directed rigs.
- EIA projected dry gas production to maintain its high production level at 107-108 Bcf/d in 2026, with 69% from Appalachia, Permian and Haynesville.
- LNG exports reached a record of 14.5 Bcf/d in 3Q25. EIA expects export to grow ~5 Bcf/d during 2025-2026, reaching 16 Bcf/d in 2026.
- Venture Global (the second-largest U.S. LNG exporter) has taken FID on CP2 Phase 1, a 20 Mtpa project slated for commissioning in 2027.

US Storage Level

Unit: Bcf

— Storage — 5yr - high — 5yr - low
Forecast

- At the end of 3Q25, natural gas inventories were 3.6 Tcf, 5% above its five-year average. EIA forecasted the same level of storage at the end of injection season assuming near-normal winter temperatures.
- Market is balancing between rising demand from expanding LNG export capacity and the higher production in the key areas.

Healthy gas price outlook in 2025-2026

US Rig Count vs Henry Hub Price

US oil and natural gas rig count

Unit: rigs

Henry hub spot price

Unit: \$/MMBtu

Comments

- ➔ Oil and gas rig count held steady QoQ at 541 rigs. Oil-directed rig declined but is offset by an increase in gas-directed rig of 7% QoQ
- ➔ EIA now forecasts 2026 Henry Hub at \$3.8-4.0/MMBtu, citing a balanced market—rising production in major basins supporting growing gas-fired power demand and expanding LNG exports.

Note: (1) As of 8 Oct 2025; (2) Short-Term Energy Outlook (Oct 2025)
Source: EIA Short-Term Energy Outlook (Oct 2025), Baker Hughes US natural gas rotary rig count (Oct 2025)

CCUS Business: Progress and development

Operational summary

ROM Production and Key Updates

Australia Coal

2025 target: 7.6 Mt

-34%
YoY

-38%
QoQ

- Total ROM production for 3Q25 was 1.5 Mt down QoQ due to Springvale longwall relocation.
- 4Q25 production is targeted to increase to 2.3 Mt, as both Mandalong and Springvale operate without longwall relocations.

China Coal

2025 target: 11.1 Mt

-%
YoY

-%
QoQ

- Gaohe:** Stable Q3 performance supported by mining efficiency improvements, effective cost control, and rise in China coal price index since July 2025 due to lower inventories and high summer demand.
- Hebi:** Continued LTCC3006 retreat mining, efficiency improvements, and operation cost control measures, and raw coal price negotiations.

Indonesia Coal

2025 target: 21.1 Mt

-14%
YoY

-2%
QoQ

- 3Q25 production was at 5.0 Mt following lower production from Melak area due to heavier rainfall than expected while 4Q25 production is targeted at 5.7 Mt, making FY25 production at 21.1Mt.
- GPK production in 2H25 will be adjusted due to inventory capacity limits, with higher output expected after capacity expansion next year.

Mongolia Coal

2025 target: 1.5 Mt

n.a.
YoY

+57%
QoQ

- 3Q25 production increased following the Coal Handling and Preparation Plant (CHPP) upgrade. However, seasonal extreme cold weather is expected in 4Q25 which will impact production.
- The full-year production target remains 1.5 Mt, reflecting prudent planning.

Mining Business:

Cost summary

NEXT GEN. MINING

Average Total Cost Breakdown

Australia Coal ⁽¹⁾

Unit: A\$/t

- 3Q25 average cost rose QoQ to A\$178/t, driven by Springvale's temporary uplift from the longwall relocation, which will normalize in 4Q.
- Cost control remains a key focus, targeting large-scale contracts, digital maintenance tracking, and workforce planning, with FY25 cost forecast to be 12% lower than 2024.

China Coal

Unit: RMB/t

GAOHE

- 3Q25 total cost decreased to RMB 375/t at Gaohe supported by lower operating cash costs, but increased to RMB 952/t at Hebi, driven by all rise in three cost segments.
- Continued focus on cost management at both mines to sustain profitability.

HEBI

Indonesia Coal

Unit: \$/t

- 3Q25 avg. cost (excl. royalty) was maintained at \$55/ton.
- FY25 avg. cost (excl. royalty) is estimated to be at \$56/t, reflecting a 9% decrease YoY and FY25 total cost (incl. royalty) is expected at \$65/t.

Mongolia Coal

Unit: \$/t

- The total cost for 3Q25 was US\$15.4 per ton, reflecting improved operational efficiency. This was driven by a 57% increase in production following the CHPP upgrade and successful contractor collaboration to enhance overall cost-effectiveness.

Note: (1) These figures do not include selling, distribution and royalty costs; based on 'sold' production; (2) Including repair and maintenance, salaries and allowances, inventory adjustment, others etc.

Global thermal coal market

COAL DEMAND AND SUPPLY CHANGE – 2025e VS 2024

Unit: Mt

■ Demand ■ Supply

Demand trends

Global coal demand remains resilient, driven by restocking, industrial activity, and constrained supply, though high inventories may curb spot demand. The outlook is weighed down by economic uncertainty and geopolitical risks.

- **China:** Anti-involution policies are expected to dampen coal demand and supply, while nationwide safety inspections will further tighten coal output and lift domestic coal prices, making imports more competitive.
- **India:** Post-monsoon coal demand has picked up in the power and industrial sectors, while strong domestic output and tax reforms are expected to stabilize coal import demand.
- **JKT ⁽¹⁾:** Coal demand has moderated due to seasonal restrictions in coal plant operations following stricter emissions regulations. Stronger nuclear availability and renewables continue to displace coal in the power mix.
- **Europe:** Heading into the post-shoulder season, coal demand in Europe is expected to rise modestly, supported by winter restocking and potential shortfalls in wind generation. However, high gas storage levels may cap demand.

Supply trends

Global coal supply remains ample overall, though localized disruptions from weather, logistics, and regulatory delays are affecting availability in some regions.

- **Indonesia:** Coal supply remains broadly stable, but heavy rainfall and delays in RKAB approvals are constraining output.
- **Australia:** Exports have rebounded after Q2 weather disruptions, but the outlook remains cautious as Newcastle port congestion and a ship loader outage continue to tighten supply.
- **Others:** Russia's thermal coal exports are expected to remain stable despite rail bottleneck to far east ports. South Africa faces weak demand limiting export growth, while Colombian exports remain subdued, though some Asian buyers show restocking interest amid competitive prices and tight HCV supply.

Energy trading: Energy trading 3Q25 updates

IMPLEMENTED MARKETING & SALES STRATEGY, SECURING SUPPLY DEALS VIA TENDERS AND OPTIMIZING ARBITRAGE IN HIGHLY LIQUID PHYSICAL AND FINANCIAL MARKETS

5,325 GWh

accumulative sales

1,875 clients

decreasing from
1,956 clients in 2Q25

9 utility areas

From both private and
public sectors

54% of total sales are market-linked price products, while the remaining sales are fixed-price contracts secured through tendering and hedged to minimize potential risks.

KEY SUCCESS FACTORS

Long-term trading

- Hedge for immediate profits and long-term gains across physical and derivatives markets.
- Optimize cash flow to maximize trading opportunities as a market maker.

Short-term and asset backed trading

- Implement AI price forecasting for both short-term and asset backed trading.
- Higher trade volume boosts arbitrage profits between physical and financial markets.

Retailing

- Combine fixed, market-linked, and option pricing to give clients flexibility.
- Clients can keep original contract terms or choose alternatives during peak demand.

Solar Rooftop 3Q25 updates

BANPU NEXT, AMATA VN, AND SOLARBK FORM PARTNERSHIP TO DEVELOP SOLAR ROOFTOP SYSTEMS ACROSS AMATA INDUSTRIAL PARKS IN VIETNAM

227 MW

Combined rooftop solar capacity across Amata City Ha Long (686 ha) and Amata City Long Thanh (410 ha) industrial parks in Vietnam.

ADVANCING BANPU NEXT'S NET ZERO COMMITMENT

- ❑ Expands C&I rooftop footprint in high-growth market, supporting Vietnam's growing electricity demand and supply challenges while aligning with the country's net zero ambitions
- ❑ The partnership is expected to transform Amata's industrial parks into green manufacturing hubs, balancing economic growth with environmental responsibility

Early 2026

Expected project implementation date

KEY COLLABORATION TARGETS

- ❑ Banpu Next and Solar BK own a 65% stake through ESCO Next LLC while Amata VN holds the remaining 35% stake
- ❑ Strengthen existing partnership with SolarBK in Vietnam by teaming up with Amata VN to expand clean-energy adoption across Amata's industrial-park network.
- ❑ Leverage Banpu NEXT's energy-management expertise, SolarBK's solar-engineering capabilities, and Amata VN's industrial-park platform to deliver integrated Net Zero energy solutions in a fast-growing region.

THE COLLABORATION FOR SOLAR ROOFTOP DEVELOPMENT IN AMATA INDUSTRIAL PARKS IN VIETNAM

NEW SOLAR ROOFTOP PARTNERSHIP

Appendix I

TRANSACTION

New Banpu: post-amalgamation benefits

01 Simplified structure enabling distinct strategies

Distinct strategies and unique roles for each business for seamless strategic execution.

03 Enhanced agility, execution flexibility, and optionality

Enabling faster decisions, value creation, and optimized asset use.

05 Realization of full asset value

Asset revaluation to unlock true market potential and maximize value to stakeholders.

02 Streamlined governance driving transparency and efficiency

Leaner governance eliminates duplication and boosts clarity, efficiency, and transparency.

04 Catalyst for Energy Symphonics 'Net Zero' ambitions

Restructuring accelerates decarbonization by removing barriers to transition plans.

06 Strengthened balance sheet and cashflow resilience

Consolidated cashflow enhances reinvestment to new growth, debt reduction, and financial strength.

STRUCTURAL BENEFITS

STRATEGIC BENEFITS

FINANCIAL BENEFITS

Amalgamation of Banpu and BPP

Swap of all shares in Banpu PCL and BPP into shares in a ‘NewCo’ and list NewCo shares on the Stock Exchange of Thailand (“SET”)

The amalgamation will simplify the listing structure by eliminating the two-tier PCL and dual listing status, which will enhance efficiency, support portfolio optimization, and enable future restructuring.

KEY TERMS AND CONDITIONS		
Initial Swap Ratio	0.35575 NewCo shares : 1 Banpu share	
	0.74615 NewCo shares : 1 BPP share ⁽³⁾	
Swap Ratio Adjustment Mechanism	The General Offer will be launched before the amalgamation. The swap ratio will be adjusted based on the participation rate ⁽⁴⁾ after the General Offer to reflect changes in shareholding.	
	FINAL SWAP RATIOS:	
		$= \frac{0.35575}{1 - (\text{General Offer Participation Rate} \times 0.11986)}$ NewCo shares per 1 BANPU share
		If Participation Rate $\leq 100\%$$= \frac{0.74615}{1 - (\text{General Offer Participation Rate} \times 0.11986)}$ NewCo shares per 1 BPP share If Participation Rate = 100%$= 0$
NEWCO		
Name & Ticker	Maintain Banpu name and ticker	
No. of Shares	4,049,621,973 shares (at par of THB 10 per share) after capital increase by BANPU	

Note: (1) NewCo will indirectly holds shares in BKV through (a) Banpu North America Corporation, which is the 100% subsidiary of BOG Co., Ltd., a wholly-owned subsidiary of Banpu. BNAC currently holds approximately 71.0% of BKV's issued and outstanding common stock prior to the issuance of the stock consideration to Banpu Power US Corporation (BPPUS), a wholly owned subsidiary of BPP. On a pro forma basis after giving effect to the proposed transaction, is expected to hold approximately 67.0% of BKV's issued and outstanding common stock; and (b) BPPUS which will hold approximately 5.6% in BKV post-sale of 25% in BKV-BPP Power, LLC, where the number of shares will be determined by dividing the amount equal to 50 percent of the total consideration by the 20-day VWAP ending 28 October 2025; (2) Indirectly held through BPPUS, which is a wholly owned subsidiary of BPP; (3) Excluding BPP's shares held by Banpu, as the allocation above already reflects the equity interest held by Banpu; (4) Number of shares sold in the general offer over shares not held by Banpu (650,532,203 shares)

48

General Offer

Banpu to make General Offer for all minority shares in BPP (approximately 21.3% of total issued and paid-up shares)

The general offer provides Banpu with an opportunity to invest in a high-conviction business within the group, decreases potential dilution to Banpu's shareholders from the amalgamation, and is expected to generate returns in-line with Banpu's investment criteria

KEY TERMS AND CONDITIONS	
Offeror	: Banpu Public Company Limited
Amount	: 21.3% of total paid-up shares in BPP (excluding shares held by the offeror)
General Offer Price	: THB 13.00 per share
General Offer Period	: 1 – 23 December 2025
Source of Funding	: Internal cash and debt financing

Note: (1) Banpu indirectly holds shares in BKV through Banpu North America Corporation, which is the 100% subsidiary of BOG Co., Ltd., a wholly-owned subsidiary of Banpu. BNAC holds approximately 71.0% of BKV's issued and outstanding common stock ; (2) Indirectly held through Banpu Power US Corporation, which is a wholly owned subsidiary of BPP

BPP executes a sale of 25% in US-based power generation JV to BKV (1/2)

BPP subsidiary plans to sell a 25% membership interest in the US-based power generation JV, BKV-BPP Power, LLC (BKV-BPP Power), to BKV for consideration of US\$376 M, less 25% of the JV's net debt as of the closing date.

This will allow the US- based power joint venture to be consolidated under BKV and optimize synergistic potential between assets in the US and the valuation of BKV-BPP Power platform.

Note: (1) Banpu indirectly holds shares in BKV through Banpu North America Corporation, which is the 100% subsidiary of BOG Co., Ltd., a wholly-owned subsidiary of Banpu. BNAC holds approximately 71.0% of BKV's issued and outstanding common stock prior to the issuance of the stock consideration to BPPUS, and, on a pro forma basis after giving effect to the proposed transaction, is expected to hold approximately 67.0% of BKV's issued and outstanding common stock;

(2) Indirectly held through Banpu Power US Corporation, which is a wholly owned subsidiary of BPP;

(3) The number of shares will be determined by dividing the amount equal to 50 percent of the total consideration by the 20-day VWAP ending 28 October 2025

BPP executes a sale of 25% in US-based power generation JV to BKV (2/2)

BPP subsidiary plans to sell a 25% membership interest in the US-based power generation JV, BKV-BPP Power, LLC (BKV-BPP Power), to BKV for consideration of US\$376 M, less 25% of the JV's net debt as of the closing date.

This will allow the US- based power joint venture to be consolidated under BKV and optimize synergistic potential between assets in the US and the valuation of BKV-BPP Power platform.

KEY TERMS AND CONDITIONS	
Buyer	: BKV Corporation
Seller	: Banpu Power US Corporation (wholly owned subsidiary of BPP)
% Divestment	: 25.0%
Total Consideration	: US\$ 376 million, less 25% of the JV's net debt as of the closing date consisting of: • 50% in cash and 50% in newly issued common shares in BKV • Number of shares will be determined by dividing the amount equal to 50 percent of the total consideration by the 20-day VWAP ending 28 October 2025. **Based on BKV-BPP's net debt of approximately USD 581.8 million as of 30 September 2025, the total consideration for the 25% interest is estimated at around USD 231 million, subject to adjustment for actual net debt at closing.
Target Completion	: By 1Q26 However, the sale of BKV-BPP Power is not a condition precedent to the amalgamation

Note: (1) Banpu indirectly holds shares in BKV through Banpu North America Corporation, which is the 100% subsidiary of BOG Co., Ltd., a wholly-owned subsidiary of Banpu. BNAC holds approximately 71.0% of BKV's issued and outstanding common stock prior to the issuance of the stock consideration to Banpu Power US Corporation (BPPUS), and on a pro forma basis after giving effect to the proposed transaction, is expected to hold approximately 67.0% of BKV's issued and outstanding common stock; (2) Indirectly held through BPPUS, which is a wholly owned subsidiary of BPP; (3) The number of shares will be determined by dividing the amount equal to 50 percent of the total consideration by the 20-day VWAP ending 28 October 2025

Approval agendas

Meeting	Key Agenda	Voting Requirement
Banpu EGM	• To approve the following and relevant authorization ▶ the amalgamation ▶ the capital increase and allocation of 5 newly issued shares on a private placement basis for the purpose of completing the paid-up capital for the amalgamation	≥75% of shareholders attending the meeting and entitled to vote
BPP EGM	• To approve the following and relevant authorization ▶ the disposition of certain interest in BKV-BPP Power, LLC by its subsidiary⁽¹⁾ ▶ the amalgamation ▶ the capital decrease for the purpose of reducing the registered capital for the amalgamation	≥75% of shareholders attending the meeting and entitled to vote

Note: (1) Banpu is not entitled to vote as Banpu is the major shareholder of both BPP and BKV.

ESG leadership and credit rating recognition

BANPU ESG RATINGS

A

rating for three consecutive years for demonstrating resiliency towards long-term ESG risks and excellent risk management and mitigation relative to peers.

Member of
Dow Jones Sustainability Indices
Powered by the S&P Global CSA

Awarded since 2014

Recognized as a constituent of DJSI for conducting business with the highest ESG standards.

Awarded since 2015

Recognized in THSI for sustainable operations and responsible investment principles.

Honor since 2018

Highest distinction in SET's Sustainability Excellence Award for at least 4 consecutive years.

AAA

rating awarded by the SET ESG Ratings for strong ESG disclosures, including environmental management practices and interactions with key stakeholders.

5 stars & 5 coins

for the CGR Checklist 2023 from the Thai Institute of Directors Association (IOD) and the AGM Checklist 2023 from the Thai Investors Association (TIA), respectively.

Corporate Excellence Award

for 2024 under the Energy Business Category

ASEAN Asset Class

Awarded in 2021 ASEAN Corporate Governance Scorecard for excellent corporate governance.

CREDIT RATINGS

Best Public Company of the Year 2023 in the SET & Best Company of the Year 2023 in the Resources Industry

Awarded by Money & Banking Magazine for Banpu's exceptional ability to effectively manage business and organization.

A+ Credit rating

with a **'stable'** outlook on the company and senior unsecured debentures reflecting the company's stable business growth.

Banpu: ESG recognition across the subsidiaries

Responsibly Sourced Gas (RSG) Gold Rating Certification

BKV's NEPA wells and facilities were awarded with TrustWell Gold accreditation for operational excellence, safety, and environmental stewardship, allowing BKV to market and sell certified RSG to the market.

Gold accreditation is awarded to top 25% most responsible gas operators by Project Canary, a leading and widely regarded 3rd party certification company.

The certification was awarded to 100% of BKV's NEPA production and a portion of BKV's Barnet production in 2022.

BBB Management Rating

ITM received the "BBB Management" rating for its commitment to implementing ESG and Sustainability Development Reporting.

The Best Energy Sector on the Main Board

Awarded at the CSA Awards 2023 for ITM's positive financial and operational performance, and continuous commitment to growth and adaptability in the energy sector.

Gold Ranking since 2020

Awarded in the Asia Sustainability Reporting Rating (ASSRAT) 2023, reflecting a consistent commitment to sustainability and environmentally friendly business practices

ESG EXCELLENCE

Established ESG Committee in March 2023 to supervise ESG targets and performance

Coal Imports recover amid domestic supply constraints

CHINA THERMAL COAL IMPORTS/EXPORTS*

Unit: Mt

CHINA DOMESTIC COAL PRICES

Unit: RMB/t

Note: *Includes lignite but excludes anthracite imports/exports

Source: www.sxcoal.com/cn (11th October 2025), Banpu MS&L

3Q25

- China's economic recovery remains weak, with supply-side reforms curbing industrial output and dragging down key indicators. GDP grew 4.8% YoY in Q3 2025, down from 5.2% in Q2. Growth averaged 5.2% for January–September, slightly below the 5.3% in H1.
- China has implemented anti-involution policies across multiple industries, which are expected to cut both coal demand and supply.
- Chinese domestic coal prices surged, driven by heatwaves and supply constraints.
- Power consumption reached 2,926.4 TWh in 3Q25, up 5.0% YoY, versus 19.0% growth in 2Q25, as heatwaves drove up air conditioning demand.
- Coal-fired power generation edged up 0.4% YoY to 1,754.9 TWh in 3Q25, supported by summer electricity demand despite strong renewables.
- Coal production fell 1.5% YoY to 1.18 billion tons in 3Q25 due to the government's crackdown on overproduction and heavy rain in the mining regions.
- Thermal coal imports dropped 13% YoY in 3Q25 to 90.4 Mt, pressured by weak demand, high inventories, and rising domestic coal prices.

OUTLOOK

- Thermal coal demand is set to rise in 4Q25 and early 2026, driven by winter heating needs, however, renewable capacity growth will limit upside.
- Ongoing safety inspections and overproduction crackdowns are expected to cap domestic coal output this winter. However, we expect coal production will recover somewhat towards the end of the year to meet winter demand.
- Domestic coal prices are expected to stay firm through 4Q25 amid supply constraints, while cheaper imports drive demand for seaborne coal.
- Potential La Niña this winter raises concerns over production disruptions, amid tightening policies and volatile demand reshaping the supply-demand balance.
- Anti-involution and environmental policies continued to influence production and consumption patterns, reinforcing the shift toward cleaner energy while maintaining coal as a backup for energy security.

Strong domestic coal output curtails imports

INDIA THERMAL COAL IMPORTS*

Unit: Mt

Quarterly (annualized)

Annually

3Q25

- India's total electricity generation reached 391.8 TWh in 3Q25 remained flat year-on-year as an extended monsoon helped suppress power demand.
- Imported coal-fired generation edged down 1.1% YoY to 298.5 TWh due to strong hydro and wind generation.
- Domestic thermal coal production remained flat YoY at 197 Mt despite heavy rainfall but dropped 15% QoQ in 3Q25.
- Thermal coal imports fell 5% YoY to 35.4 Mt in 3Q25, but drop 15.9% QoQ, due to the extended monsoon, port and plant stocks remain sufficient to demand.
- India raised GST from 5% to 18% and removed the INR 400/t coal levy effective 22 Sep, benefiting domestic coal. Industrial users benefit via input tax credits, while power generators under PPAs can pass on costs. Spot market generators face margin pressure as they cannot offset the tax hike.

OUTLOOK

- Power demand is projected to rise in 4Q25, driven by a potential harsher winter that could elevate heating-related electricity demand.
- India's domestic coal production is showing signs of recovery following the end of the rainy season, as mining operations resume at full capacity and output gradually rebounds to meet rising demand from power plants and industrial users.
- Power sector import demand is expected to decline as domestic coal supply rises and the government's blending mandate expired on 30 June 2025.
- Industrial coal demand has rebounded post-Diwali and rainy season, driven by resumed operations and stronger economic activity.
- We expect thermal coal imports are expected to remain largely stable in 4Q25 on strong domestic supply, underscoring progress toward reducing import dependency – a key government objective aimed at achieving self-reliance.

Note: *Includes lignite grade imports
